**NCDOT**  
**5** **YEAR** **WORK**  
*program*

**NCDOT**  
**5** **YEAR** **WORK**  
*program*

This 5 year work program contains the projects, programs and services that NCDOT will accomplish from 2010-2014 to improve safety, mobility and the physical condition of our transportation network.

In response to Governor Bev Perdue's call to reform transportation decision making and improve accountability in state government, the Work Program breaks down the activities of the Department into the following categories:

- ◆ Multimodal Product – construction, right of way and other elements of capital projects to improve safety, mobility and infrastructure health
- ◆ Product Support - engineering and environmental mitigation to support projects
- ◆ Operations & Maintenance – activities and projects to operate and maintain our multi-modal transportation network
- ◆ Administration – management and support
- ◆ Other – transfer to others and debt service

The dollar values in this Work Program are based on the state fiscal year 2010-2011 certified budget and projected cash expenditures unless otherwise noted. For information on the use of cash management at NCDOT, see the Definitions section of this document.

The Work Program differs from the Statewide Transportation Improvement Program (STIP or TIP) in that it includes all of the funds that NCDOT uses, not just those for capital improvements. The Work Program is also more static and constrained by revenue projections and cash availability. Once the projects and funding levels in this Work Program are approved by the Board of Transportation any changes will require approval of a Work Program amendment by the Board.

Key to effective implementation of the Work Program is the department's organizational metrics which determine our success. The five-year Work Program is evaluated quarterly against our Executive Measures -30 key indicators, organized by our departmental goals of safety, mobility and infrastructure health, that we aspire to achieve, such as reducing crash rates and improving the condition of our bridges and pavements. An Organizational Performance Dashboard found on our website [www.ncdot.gov](http://www.ncdot.gov) gives a high-level snapshot of the performance in our five major goal areas.

This Work Program is part of a larger "Policy to Projects" framework that includes a 20-year North Carolina Transportation Plan that incorporates significant public input to set high level mission and goals, strategies and objectives. A 10-year Program and Resource Plan outlines our longer-term financial resource needs and performance targets for NCDOT program areas. Work on the 20 and 10-year plans is currently underway.

The Work Program represents the Department's realistic plans for projects we expect to execute in the five-year period. We expect to be held accountable by the Board of Transportation and the public for accomplishing the program. This first NCDOT 5-Year Work Program outlines NCDOT's approach to meeting our mission of connecting people and places in North Carolina - safely and efficiently, with accountability and environmental sensitivity.

DRAFT

Notes:  
All values throughout this Work Program reflect actual cash spending amounts, in millions, unless otherwise noted.  
This Work Program reflects the Certified budget constrained by the NCDOT Cash Model which is based on projected revenues.  
Any changes to this Work Program will be made through the formal amendment process.

This list identifies the multimodal capital projects that will be under construction or in effect during Fiscal Years 2010 -2014.

This Work Program includes a fiscally constrained subset of projects in the June 2008 Statewide Transportation Improvement Program (STIP). The federally mandated STIP contains a much larger list of projects that are in various stages of planning, design, Right of Way acquisition or construction.

The Work Program includes projects funded by Grant Anticipation Revenue Vehicles or "GARVEE" bonds and American Recovery and Reinvestment Act (ARRA) funds as well as traditional sources of transportation funding. The Work Program does not include projects funded with Urban Loop funds. An Urban Loop prioritization model is currently under development by the Strategic Planning Office of Transportation (SPOT). Following formal review and approval of this model, urban loop projects will be prioritized and included in the May 2010 Work Program.

The projects in this section are separated into 2 lists. The first includes projects that are let to design-bid-build, design-build and purchase order contracts. The second list includes statewide projects. Statewide projects do not have specific locations but occur in various locations across the state. They are often for programs more so than typical construction projects and include things that occur across the state such as traffic operations, roadside beautification, scour evaluation for bridges, etc.

For the projects let to contract the values reflected in the "Cost" column reflect the total contract award amount. This differs from the amount reflected in "Product" as product reflects only dollars that will be paid out on these projects during a given fiscal year. Since most projects are built over several years they are reflected in "Product" over time not only in the year they are awarded to contract. Product also includes payments to contractors for projects that have been awarded in the past but are still under construction.

For Statewide projects the amount reflected in "Product" reflects the historical cash spend rate for these projects. In some cases this differs from the programmed amount.

Division Managed Construction Projects (including Contingency, Economic Development, Secondary Road Construction, Small Construction, Division Spot Safety, and Access and Public Service Road are included in Section III. Operations & Maintenance.

Projects that support routine, operating or maintenance activities are considered Operations projects and are shown in Section III. Operations & Maintenance.

																65%	13%	22%

These values are contract or grant awards, not cash spending.  
The highway values are for construction contracts only, except U 209 B ROW which is for Right of Way. Other ROW costs are found in Product under Right of Way.  
Transit ARRA projects were divided equally between 2010 and 2011and attributed to the mobility goal. Urban projects were attributed to regional tier and rural projects were attributed to the sub-regional tier.  
These values do not include ARRA Rail projects. This table will be updated to include ARRA Rail Projects when they are approved by FRA. See attached listing of proposed ARRA Rail Projects.

# Congestion Mitigation and Air Quality (CMAQ) Improvement Program Projects

MPO/RPO	STIP #	Description	2010	2011	2012
Statewide	C-4901	Rail Division, Construct a second main track on the North Carolina Railroad between Thomasville and Lexington in Davidson County.	\$ 1,750,000	\$ 1,750,000	
	C-4903	North Carolina Division of Air Quality. North Carolina Air Awareness Outreach Program providing education through employer coalitions, classroom education, public outreach and produce daily air quality forecast.	\$ 500,000	\$ 500,000	\$ 500,000
	P-2918	Rail, third daily frequency run of the Carolinian & Piedmont	\$ 3,448,000	\$ 3,569,000	
Burlington-Graham	TD-4920	Park and Ride Development	\$ 224,438		
Cabarrus-Rowan	C-4905	Rowan County, China Grove, Salisbury and Kannapolis, express route between Kannapolis and Salisbury. New connecting service to the Charlotte CATS System between Rider and Salisbury Transit or downtown Kannapolis to downtown Salisbury. (Transferred to Public Transportation)	\$ 120,000		
	C-4908 A	Salisbury, Section A, Horah Street. Construct sidewalk, Brenner Avenue to Partee Street.	\$ 26,400		
	C-4908 D	Section D, Arlington Avenue. Construct pedestrian connector, Arlington Avenue bus stop to Walmart parking lot.	\$ 14,400		
	C-4908 E	Section E, Bringle Ferry Road. Construct sidewalk on Bringle Ferry Road, Long Street to Newsome Road.	\$ 106,112		
	C-4908 G	Section G, Salisbury Mall sidewalk. Construct sidewalk on Jake Alexander Boulevard West, Southern Railroad to Statesville Boulevard and on Statesville Boulevard, Holly Avenue to Jake Alexander Boulevard West.	\$ 46,915		
	C-4911	Catawba College, expansion of Air Quality Outreach Program. Public outreach efforts to reduce ozone air pollution through support of Congestion Mitigation.	\$ 237,993	\$ 237,994	\$ 237,994
	C-4916 A	Kannapolis, Section A, install sidewalk on Dale Earnhardt Boulevard, Hudson Street to South Cannon Boulevard.	\$ 187,200		
	C-4916 C	Section C, Oakwood Avenue, install sidewalk, Windsor Avenue to Shady Brook School.	\$ 232,000	\$ 24,000	
	C-4918 B	Section B, US 601 and NC 3. Construct additional turn lanes at the intersection.		\$ 1,035,932	
	C-4921	Harrisburg, construct sidewalks to connect neighborhoods and town center.	\$ 300,000		
Capital Area	C-4923	Raleigh, Citywide upgrade of signal system.	\$ 6,000,000		

Years are Federal Fiscal Years

## Congestion Mitigation and Air Quality (CMAQ) Improvement Program Projects

Durham Chapel Hill Carrboro	C-4924 B	Triangle J Council of Governments, Transportation Demand Management program coordination for employers and organizations in the Triangle ozone non-attainment region for a period of three years. (flexible work schedules)	\$ 304,000	\$ 279,000	\$ 299,000
	C-4928	Durham, Morreene Road Bicycle-Pedestrian Facility. Construct bike lanes and sidewalks on Morreene Road between Neal Road and Erwin Road.	\$ 222,180		
	C-4932 A	Orange County-Hillsborough, construct a 125-space park and ride lot and operating assistance for three years for new transit service including two transit shelters and four bicycle racks for transit buses.	\$ 41,104	\$ 41,104	
	C-5103 (OP)	Purchase two Hybrid Electric Buses and provide portion of operating assistance for two years.	\$ 247,000		
	C-5104 (OP)	Purchase two Hybrid Electric Buses and provide portion of operating assistance for three years.	\$ 94,000	\$ 97,000	
Gaston	C-4934	NC 279 (New Hope Road), Burtonwood Drive to SR 2466 (Garrison Boulevard). Widen to a five lane section.	\$ 780,500	\$ 780,500	
Greensboro	C-5105	Greensboro, Guilford County. Greensboro Transit Authority (GTA) expanded Evening Service routes from seven to fifteen.	\$ 655,667	\$ 655,666	
High Point	C-4936 B	Piedmont Authority for Regional Transportation (PART-Greensboro), implement a Regional Air Quality Awareness Program in collaboration with area MPO/RPO's.	\$ 33,200	\$ 33,200	\$ 33,200
Kerr Tar	C-4939	Franklin County, construct a bike-pedestrian path in former rail corridor (Cotton Market Rail Trail) to connect Town of Louisburg, Vance- Granville Community College, and the Sky Sports Airport.	\$ 175,535	\$ 175,535	
	C-4940	Granville County, construct bicycle-pedestrian paths to link high density residential areas to two major employment centers to promote an alternative means of work-related transportation.	\$ 281,250	\$ 281,250	\$ 281,250
	C-5145	Roxboro, N. Main Street Sidewalk	\$ 249,216		
	C-5144	Creedmoor, Cross-Town Pedestrian-Bicycle Sidewalk & Trail	\$ 400,000		
Lake Norman	TA-4785	CATS Replacement Buses	\$ 680,000		
	C-5149	Cloninger Rail Train Extension	\$ 468,000		
	C-5147	Sidewalks along NC 150	\$ 180,000		
	C-5148	Sidewalks along Mountain Street	\$ 100,000		
	C-5146	Truck stop electrification at I-85 Exit 5	\$ 540,000		
Land of Sky - SW	C-5150	Park Shuttle from Oconaluftee Visitor Center (NC) to Sugarlands Visitor Center (TN)	\$ 445,011		
	C-5152	"Transportation Choices" Public Education Campaign in the Smokies	\$ 100,000		
	C-5151	Mixed Use Pathway within the Great Smokies National Park	\$ 177,000		

Years are Federal Fiscal Years

# Congestion Mitigation and Air Quality (CMAQ) Improvement Program Projects

Mecklenburg Union	C-4952 A	Charlotte, Section A, construct a Park and Ride lot at Providence and I-485.	\$ 800,000	\$ 800,000	\$ 1,200,000
	C-4952 B	Section B, construct Park and Ride lot at future location of the NE I-485 Station (US 29/I-485).	\$ 200,000	\$ 800,000	\$ 1,400,000
	C-4954	Charlotte, purchase expansion and replacement buses. (Transferred to Public Transportation)	\$ 920,000	\$ 920,000	\$ 920,000

2000 = Management and Admin Support (ie Admin Budgets)  
\*\* = Does not include Equipment, which is included in Section III. Operations & Maintenance.  
\*\*\* = Does not include Program Development which is included in Trust Fund Admin.  
\*\*\*\* = Does not include IT Fuel Tax Evasion which is Trust Fund Admin. Does not include HB 1779 which is receipts supported.  
\*\*\*\*\* = Does not include GS Century Center which is Trust Fund Admin.  
\*\*\*\*\* = Does not include Emissions Inspection which is Revenue Supported. Vehicle Registration and Driver's License are included in Section III. Operations & Maintenance.  
\*\*\*\*\* = Does not include Workers Comp which is Revenue Supported.  
\*\*\*\*\* = Does not include Quality Enhancement Unit.  
\*\*\*\*\* = Civil Rights/EEO appear in 2 areas - one is Highway Trust Funded, one is Highway Funded.  
\*\*\*\*\* = After 2009 Turnpike Admin is no longer separately funded.

<b>Work Program Versus Statewide Transportation Improvement Program (STIP)</b> .....	126

## Work Program Categories

### **I. Product**

This includes Right of Way (ROW) and construction dollars for on-going and future capital projects. It includes projects included in the Statewide Transportation Improvement Program (STIP) and other projects. It includes Statewide Projects, Purchase-Order Contracts, Agreements, Modal, GARVEE and American Recovery and Reinvestment Act (ARRA) capital projects. It includes both traditional let and design-build projects. It also includes grants NCDOT provides to others for transit, rail, aviation, pedestrian and bicycle projects.

Product will include Turnpike construction and ROW costs once these become part of the Work Program.

### **II. Product Support**

Preliminary Engineering includes NCDOT and North Carolina Turnpike Authority (NCTA) field employee and consultant charges to projects. This category does not include Administrative charges. It includes all phases of preliminary engineering including planning, project development and environmental analysis, natural systems mitigation and design. It also includes funding provided to the geographically designated Metropolitan Planning Organizations (MPO) and Rural Planning Organizations (RPO) for Transportation Planning.

Construction Engineering & Inspection (CE&I) includes CE&I for traditional and design-build projects.

Environmental Mitigation is the Ecosystem Enhancement Program (EEP).

### **III. Operations & Maintenance**

This includes Highway Maintenance & Modernization, Highway Operations, Modal Operations and Governor's Highway Safety Program. These dollars represent charges for labor (maintenance and engineering), materials and equipment.

Modal Operations are the “operational component” of modal dollars.

Highway Operations dollars are also subtracted out of I. Product.

Equipment costs are funded through equipment rental charges posted to projects and cost centers and therefore do not show up as a separate line item. Usage of each piece of equipment is charged to a project or external entity in the form of a rental rate. The accumulation of the hourly rental or daily flat administrative rate, depreciation, and book value disposals provides Equipment Operations with the funds to purchase, repair, replace, and maintain roadway construction and maintenance equipment for the Division of Highways and for all overhead costs associated with the management and operation of the Equipment Operations System.

Division of Motor Vehicles (DMV) Operations items are extracted from the cash model line item for DMV by pro-rating them using the categories and fund allocation percentages found in the 2008-2009 Authorized Budget.

This includes major repairs and renovations to NCDOT facilities for optimal asset management. Many of the identified repairs are to maintenance facilities across the state. (Note: There are no funds programmed for major repairs for FY 2010-2014.)

#### **IV. Administration**

This includes Central, Highways, DMV and Trust Fund Administrative Budgets.

Percentage split between administrative functions within these categories was based on pro-rata share from the 2008-2009 Authorized Budget.

#### **V. Other**

This includes Transfers and Debt Service.

Transfer to Turnpike includes the total transfer reduced by the Turnpike administrative dollars shown in IV. Administration.

Debt Service includes traditional General Obligation and GARVEE Bond debt service.

## Project Categorization Elements

(Goal, Tier & Mode and Capital/Operations)

### Goal

#### **Safety**

Projects where the *primary* purpose is to improve safety. A safety project may also improve the condition of the facility or mobility along the corridor. Examples include:

- Spot Safety projects
- High Hazard Elimination projects
- Guardrail projects
- Upgrade to interstate standards projects, where no additional capacity or lanes are included
- Upgrade roadway projects, where no additional capacity or lanes are included (especially in mountainous areas)
- Rail crossing and safety projects
- Traffic signals
- Rumble strips
- Transit safety
- Bicycle and pedestrian safety
- Aviation safety

#### **Mobility**

Projects where the *primary* purpose is to improve mobility or improve access. This includes the majority of projects which add capacity or improve travel time, even if the safety or condition of the facility is also improved. Examples include:

- Widening projects (including projects with incorporate a bridge replacement project)
- Urban Loop projects
- Intrastate System projects
- Signal system projects
- New location projects (unless a project is to relocate a facility to improve safety)
- Convert grade-separation to interchange projects
- Operational improvements, such as ITS projects
- Bicycle and pedestrian projects
- Public transportation expansion projects or vehicles
- Industrial access projects
- Rail service expansion projects
- Ferry service projects
- Aviation projects

#### **Infrastructure Health**

Projects where the *primary* purpose is to improve the condition of the infrastructure. Projects that improve the health of the infrastructure and safety of the facility are typically classified as infrastructure health, unless the primary purpose is to improve safety. Examples include:

- Reconstruction, rehabilitation, resurfacing, repair, replacement, or preservation projects

- Bridge projects
- Interstate Maintenance projects
- Rest area projects
- Ferry projects
- Public transportation replacement projects
- Maintenance facility projects
- Streetscape projects without intersection improvements
- Aviation maintenance grants
- Rail maintenance grants to short line railroads
- Ferry maintenance

Intersection or interchange improvements are classified under either Safety or Mobility, depending on the *primary* purpose of the project. For example, project R-0061C in Columbus County proposes to upgrade the existing US 74 and NC 211 signalized intersection to an interchange. While this project will help create the goal of a future interstate facility along the US 74 corridor, the primary purpose of this project is to improve the safety of this intersection. If the project has more than one primary purpose, engineering judgment was used to classify the project by the appropriate goal.

### Mode

#### Highway

Projects where the *primary* purpose is to improve the highway system.

#### Bicycle and Pedestrian

Projects where the *primary* purpose is to enhance the Bicycle and Pedestrian system. Projects which include improving a roadway facility and enhancing bicycle access (such as a resurfacing project which includes adding wide outside shoulders) are classified as a highway projects. Standalone projects which add wide outside shoulders are classified as bicycle and pedestrian projects.

#### Rail

Projects where the *primary* purpose is to improve the railroad system passenger service, and economic development. Rail safety projects may be classified as a rail project or a highway project, depending how they are classified in the STIP.

#### Ferry

Projects where the *primary* purpose is to improve the ferry system and passenger service.

#### Aviation

Projects where the *primary* purpose is to improve the aviation system state commercial/general aviation airports, and economic development.

#### Public Transportation

Projects where the *primary* purpose is to improve the public transportation system and regional/urban/rural transit systems.

## Tier

The NC Multimodal Investment Network (NCMIN)<sup>1</sup> Tiers are defined below. If a project is located at the intersection of more than one tier, the project is classified by the higher tier. An exception is at an intersection, interchange, or grade separation where the project only improves one of the facilities. In this case, the project is classified according to the facility in which the improvement is located. For example, a project that converts a grade separation to an interchange (on a freeway) is classified by the tier of facility which currently does not have access to the freeway.

Mode	Statewide Tier	Regional Tier	Subregional Tier
<b>Highways<sup>1</sup></b>	The Strategic Highway Corridors (SHC) as approved by the Board of Transportation on the SHC Vision Plan <sup>2</sup>	All primary routes (US and NC) not on the Statewide Tier	All secondary routes (SR) not on the Statewide Tier <sup>3</sup>
<b>Rail (Passenger &amp; Commuter)</b>	All intercity (including out-of-state) passenger rail service and station facilities associated with intercity services	Commuter rail service and associated station facilities which serve commuters <i>between</i> two or more counties	Commuter and light rail service and associated station facilities which serve commuters <i>within</i> a county
<b>Rail (Freight)</b>	Rail lines of strategic importance as determined by the Rail Division	All remaining rail lines not included on the Statewide Tier	N/A
<b>Ferry</b>	Ferry routes connecting Statewide Tier Highway facilities	Ferry routes connecting Regional Tier Highway facilities	Ferry routes connecting Subregional Tier Highway facilities
<b>Aviation</b>	Commercial service airports with at least 100,000 annual enplanements	Commercial service airports (Part 139 Certificated) with less than 100,000 annual enplanements	General Aviation airports with fewer than 25 based aircraft

<sup>1</sup> The North Carolina Multimodal Investment Network (NCMIN) is a tool used to stratify all the components, facilities, and modes of North Carolina's transportation system. Components of the network are typically classified on the basis of how each contributes to serving a particular type of transportation movement. Some facilities serve *Statewide* movements, while others are *Regional* in terms of the service they provide, while still others are *Subregional* (localized). This classification also associates the increasing level of state (NCDOT) or local interest in various facilities.

Mode	Statewide Tier	Regional Tier	Subregional Tier
		or General aviation airports with at least 25 based aircraft	
<b>Public Transportation</b>	Bus service and associated station facilities which serve out-of-state travel	Bus and vanpool service and associated stations facilities and passenger amenities which serve commuters <i>between</i> two or more counties	Bus and vanpool service and associated stations facilities and passenger amenities which serve commuters <i>within</i> a county
<b>Bicycle and Pedestrian</b>	NC bicycling highways (on-road)	NCDOT designated multi-county regional routes (on-road) or Off-road facilities spanning multiple jurisdictions with a length of at least 20 miles	Off-road facilities with a length shorter than 20 miles or Town, city, or county on-road bicycle networks or All sidewalks

### Notes

1. The Board of Transportation (BOT) formally designated the Strategic Highway Corridors as the highway element of the Statewide Tier on March 1, 2007.
2. An existing segment of a Strategic Highway Corridor, which is proposed to be bypassed (and the bypass has been approved by the BOT on the SHC Vision Plan), is considered to function as part of the Corridor until the bypass is open to traffic.
3. It is proposed that all secondary routes on the Statewide Tier will be evaluated for primary route designations.

### Capital / Operations

#### **Capital**

These are one time (non-recurring) capital cost projects for a new, expanded, modified, or replacement item. Upon completion, these projects will be removed from the STIP.

Examples include:

- ∞ Widening projects
- ∞ Runway extension projects
- ∞ New greenway projects
- ∞ Bridge replacement projects
- ∞ Signal system projects
- ∞ Replacement transit vehicles
- ∞ Rail cars rehabilitation projects
- ∞ CMAQ projects
- ∞ Enhancement projects
- ∞ Ferry replacement projects
- ∞ Multimodal station development projects
- ∞ Air fleet replacement projects
- ∞ New train sets

#### **Operational**

These are considered routine, operating, or maintenance costs (recurring). Examples include:

- Traffic signal system timing or maintenance
- Transit operating assistance
- Bridge inspection program
- Railroad safety inspection
- Transportation Management Center and IMAP Operations
- Ferry maintenance program
- Aviation operational and safety programs
- Rail equipment maintenance program
- New transit service

## Cash Management at NCDOT

The 5 Year Work Program reflects the Governor's Budget constrained by the NCDOT Cash Model.

### **Background**

In 2001 Senate Bill 1005 directed the Department to

- (1) utilize cash flow financing to the maximum extent possible to fund highway projects
- (2) establish necessary management controls to facilitate use of cash flow financing
- (3) strengthen the project delivery process in order to expedite project delivery and maximize use of cash flow financing of projects.

NCDOT is the only state agency that operates on a "cash flow" basis. That is, the Department is not required to have funds "on hand" to cover all existing contractual obligations, and it may let contracts years earlier against revenue it expects to receive in the future while accounting for contractual obligations already awarded. This method works best to accomplish projects that take more than one year to deliver. The advantage of developing a Work Program using the cash flow method is that the Department can align delivery of projects to financial resources. Transportation funding is optimally managed to deliver transportation facilities to our citizens much sooner and with certainty.

### **Cash Model**

To manage its operations on a cash flow basis the Department uses statistical models that were developed specifically to support NCDOT programs. The models are used to forecast financial capacity. These projections serve as the basis for the Work Program found herein.

### **Work Program**

Currently, NCDOT plans to spend approximately \$8.2 billion in the delivery of Multimodal projects from SFY 2010 – 2014. This amount represents TIP projects including \$773 million in highway improvements and \$103 million in modal improvements from the American Recovery and Reinvestment Act (ARRA).
